

**ABSTRACT**

N-substituted azacycle derivative compounds represented by formula **(I)**:

**I**

5 wherein m, q, r, t and u are independently selected from 0 or 1; and p is 0, 1, 2, or 3; and A, B, D, X, Y, R, R<sup>1</sup>, R<sup>2</sup>, R<sup>3</sup>, R<sup>4</sup>, R<sup>5</sup>, R<sup>6</sup>, R<sup>7</sup>, R<sup>8</sup>, R<sup>9</sup>, R<sup>10</sup> and R<sup>11</sup> are fully described herein. The compounds being particularly useful in compositions comprising an insecticidally effective amount of at least one compound of formula **I**,  
 10 and an insecticidally compatible carrier are also disclosed; along with methods of controlling insects comprising applying said compositions to a locus where insects are present or are expected to be present.
